WHO WE ARE

One partner. Multiple security solutions.

AFB Systems FZCO is a UAE-based defence and security technology company operating from Dubai Silicon Oasis, with a dedicated warehouse in the same free zone. We extend the regional reach of selected international technology principals – acting as their appointed agent and value-added reseller – across exclusive distribution, system design and integration, certified training and full lifecycle support. Our clients are government, military, law enforcement and critical-infrastructure operators throughout the Gulf, and demonstration equipment is held in the UAE so systems can be evaluated in operational conditions before they are specified.

MARKETS WE SERVE

HIGH-SECURITY FACILITIES

Critical Infrastructure & Datacenter

Advanced detection technologies engineered to protect critical national infrastructure, data centres and high-value assets without compromising operational efficiency.

Millimeter Wave Scanners

Walkthrough Metal Detectors

Counter-UAV

Data Center Security

Loss Prevention

SAFE SPACES · SEAMLESS EXPERIENCES

Events & Public Venues

High-throughput screening solutions designed to protect visitors while maintaining seamless access at major public venues and events.

Walkthrough Weapons Detection

Hand Held Metal Detectors

High-Throughput Screening

DETECT · LOCATE · PROTECT

Defence & Ground Search

Mission-ready technologies supporting route clearance, EOD operations and force protection across demanding operational environments.

Mine Detectors

CAPABILITIES & SERVICE DELIVERY

Exclusive regional partnerships

Appointed agent and authorised reseller for leading international technology principals.

Demonstration equipment in the UAE

Live systems stocked locally – clients evaluate before they specify.

Maintenance & lifecycle support

Preventive maintenance programmes protecting uptime and asset value.

Certified engineers

Factory-trained team holding manufacturer engineering and trainer certifications.

End-to-end project delivery

From site survey and configuration through to commissioning and handover.

GCC-wide technical assistance

On-the-ground support and training delivered across the region.

TRAINING & CONSULTANCIES

Our trainers and consultants hold professional security certifications and product-specific credentials, enabling hands-on training, system deployment, configuration and operational support across every technology we supply. We also provide Annual Maintenance Contracts (AMC) covering CEIA walk-through (WTMD) and hand-held (HHMD) metal detector units – scheduled preventive maintenance, calibration and performance verification carried out by factory-certified engineers.
